

Core Competencies

Biogen Ag Systems is an agricultural (AG) machinery and equipment manufacturer and research and development firm. We invent and implement industrial quality solutions to problems faced by farmers, ranchers, organizations, and emergency response personnel related to agricultural shortages and natural resources depletion during emergencies.

Supporting the USDA's Mission: Biogen Ag Systems safeguards AG animals for human supply and help rural economies by saving AG livelihood. We help to increase the availability of AG based economic opportunities in underserved areas to address national and world hunger issues.

Mobile Forage Units (patent pending)

- Feeding platforms for field operation use during emergencies to aid in the recovery of large animals. Manufactured to withstand harsh conditions.
- Independent operation from power for up to 30 consecutive days, requiring only water, fuel and seeds.
- Controlled environment maintains optimal growth within the unit despite the outside conditions.
- 300-4,000lbs of fresh green forage daily!

Applied Research and Development (R&D)

- Seed variants, growth vs nutrition.
- Environmental Automation and Control.
- Independent, flexible watering system.
- Climate independent, tested from 10F – 100F.
- Single man operation.

Differentiators

- Only US-based Company that designs and manufactures industrial quality solutions to problems faced by farmers, ranchers, organizations, and response personnel.
- Facilitate the wellness and welfare of “AG Animals” to the benefit of human life.
- Customized solutions to meet one-time need vs small and large operations and a variety of animal diets.

Past Performance

- “Cascadia Rising 2016” USDA Large Animal Task Force
- “Operation Pegasus 2017” War Horses for Veterans, 60 day deployment
